

# Whitelabel Setup

. . . . . . . . . . . . . .

Follow the instructions below to setup your own domain

### Step 1 - Add subdomain and logo file in application settings

1) Add your subdomain name like "mysubdomain", do not use spaces and special characters in subdoamin name. Just enter as simple name string without space. This subdomain name will use in your domain settings.

2) Select your logo file for Whitelabel agency. Your logo will be replaced with our VidScratch logo in your whitelabel application. Select a logo file to upload. JPG, JPEG & PNG files formats are allowed. File size should be 200X60px for a good view. See following screen to more details.

# Step 3 - Add A records to your domain DNS settings

We are shown these settings in GoDaddy "**DNS Management**", Where we are added A records. So follow the same steps as per your domain provider.

Records				
Last updated 20–11–2019 12:24	4 PM			
Туре	Name	Value	TTL	
А	@	171.22.120.37	600 seconds	P
CNAME	*	vidmighty.vidscratch.com	1 Hour	Ø
CNAME	_domainconnect	_domainconnect.gd.domaincontrol.com	1 Hour	Ø

- First go for edit record where **Type is A > Set Name(Host) to "@"** and **Set Value(Points to) to given IP "171.22.120.37"** then click on the save button. See following screen to more details.

- Then go for edit record where **Type is CNAME > Set Name(Host) to "\*"** and **Set Value(Points to) to given Host like "vidmighty.vidscratch.com"** in your domain settings in VidScratch then click on the save button. In GoDaddy there are two rows with Type CNAME, you just need to edit first one as above and save. See following screen to more details.

#### Step 4 - Login with given whitelabel URL

- After set your DNS settings login with given login your in domain settings in whitelabel dashboard. See following screens to more details.
